Asemic writing is polysemic, the opposite of itself.

Since the late 1990s asemic writing has concerned
itself primarily with the definitions of prefixes.

Asemic writing participates in the tradition of zerufe otiot, but not in the tradition of decorative expressionism.

Asemic writing is a spiritual discipline, not a course in the aesthetics of quasi-calligraphic drawing offered by your favorite art school.

Asemic writing is a kind of poetry. Unless you think poetry is a kind of visual art, you have no reason to think asemic writing is a kind of visual art.

Constellate, to form or cause to form into a cluster or group; gather together.

To think is to revise.
Thinking is improvisational.
I think, therefore I constellate.

If I consider points A, B, C, D and E

People Who Cannot Be Trusted Should Be Avoided Like The Plague

People who treat your pain as a form of entertainment cannot be trusted. Avoid people who treat your pain as a form of entertainment. What prevents them from intentionally causing you pain as a way of entertaining themselves?

People who sabotage and ridicule your activities cannot be trusted. Avoid them. In the company of such people, trust becomes a vulnerability to be exploited. The more you interact with them, the less you can trust them. It is best not to interact with them at all.

Trust yourself. Look in the mirror and make yourself a solemn pledge: I will not work with people I cannot trust. Is that asking too much? If so, so be it. A lot of work can be done alone.
